

**Valves & hydrants for fire protection**

**Water when you need it!**

# It's all about constraining fire with water!

Safety comes first  
– don't compromise on the quality.

AVK ensures a reliable water supply.  
We offer quality products with long life that operate faultless  
even after a long period of standstill.

When every second counts  
– you can count on valves and hydrants from AVK.

## About AVK

### From design to finished product

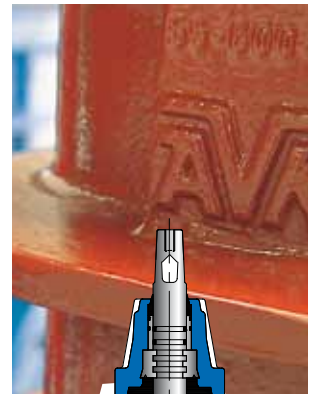

AVK's high design quality is based on thorough research of the customers' needs. AVK products are manufactured in modern factories using high technology, computerised machining centres and robots to ensure precision and uniformity. The overall framework for quality from development to distribution is our extensive quality assurance system certified to ISO 9001.

### Optimum corrosion protection for maximum durability

AVK products meet GSK requirements and conform to other international standards of effective corrosion protection. By virtue of our GSK membership (Gütegemeinschaft Schwerer Korrosionsschutz), our entire coating process complies with RAL-GZ 662 guidelines and is being monitored and approved twice a year by MPA-Hannover (Materialprüfanstalt), an independent testing institute.

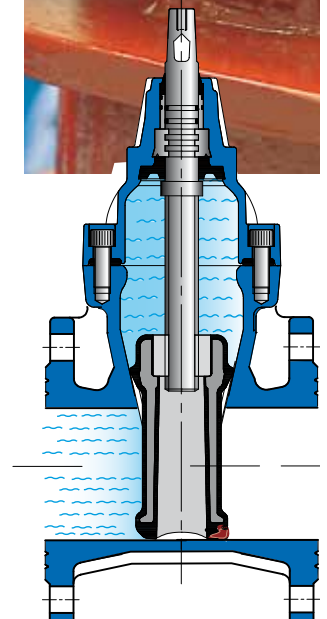

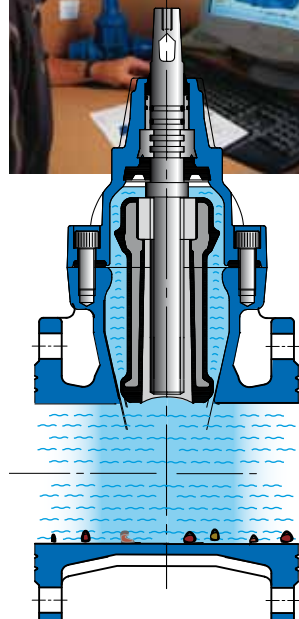

### Accessible information

Technical information on AVK products is accessible in print and electronically. Information can be sent directly to you by mail or we can arrange for a personal demonstration and guidance on specific products. AVK's show busses are constantly touring our markets. We would be delighted to pay you a visit, if you wish.

### Resilient seated gate valves

A published test from City of Roseville US, has proved that impurities up to  $\varnothing$  8.7 mm can be handled by a DN 150 mm valve without any problems. The same test proved that the unique AVK EPDM rubber quality is the only rubber quality which instantly returns to the original shape when the valve is opened again.

## Product programme

Stem cap series 04/24

Street cover series 04/74

Handwheel series 08/00

Extension spindle series 04/041

Gate valve series 06/37

Hydrant series 24/90

Gate valve package  
incl. extension spindle and  
street cover

Post indicator series 34/00

Gate valve series 25/46

Gate valve series 25/49

Street cover series 80

Monitor hydrant series 84

Repair set series 27

Ball check valve series 53/30

Ball check valve series 53/40

Repair set series 27

Hydrant series 27/00

Hydrant series 24/10

T-key series 04/15

Limit switch series 96/00

Gate valve series 25/49

Gate valve package  
incl. post indicator

Repair set series 27/75

Post indicator series 34/80

Butterfly valve series 75/11

Gate valve series 36/00

Monitor hydrant series 27

Check valve series 41

Butterfly valve series 75/41

Monitor hydrant series 84

Hydrant series 24/70

Butterfly valve series 75/31

Gate valve series 06/35
