

# PROJECT MANAGER SUPPLY CHAIN

AVK Holding is hiring a Supply Chain Project Manager to be stationed at American AVK in Minden, Nevada, USA. The Project Manager will lead the transition from the current ERP system in American AVK into the new platform based on Microsoft Dynamics 365.

American AVK manufactures and distributes valves and hydrants for customers in USA and for export markets. Supply chain processes will be the key focus during the implementation of Dynamics 365. We are therefore looking for a Project Manager with a solid background in manufacturing and supply chain management issues.

Our new Project Manager will become part of AVK Group's Supply Chain department and will report to Head of Group Logistics at AVK headquarter in Denmark.

#### Tasks:

- Mapping of current and future business processes
- Implementing best practice business processes from AVK Business System
- Securing needed master data for implementation of Dynamics 365
- Setting up and testing of Dynamics 365 within supply chain, manufacturing, and distribution in cooperation with local organisation and IT partner
- Securing training of relevant employees
- Supporting local organisation in connection with go-live and during first months after go-live
- Securing performance within supply chain after go-live

#### Profile:

- Master's degree in engineering or supply chain management
- 4-5 years of working experience

within manufacturing or supply chain management

- Experience with the set up and implementation of ERP systems (preferably Microsoft Dynamics AX or 365)
- Experience with project management and implementation of changes
- Willing to relocate to the USA for a minimum period of 18 months
- Able to communicate fluently in English (both written and spoken)
- Able to take, defend and implement initiatives efficiently
- Self-motivated and able to work independently

#### AVK offers:

- Strong career possibilities in an expanding international Group with subsidiary companies in all regions of the world
- New project management assignments within AVK's Group Supply Chain department once the current project in the USA is finalised
- Many exciting challenges in an international environment under constant development
- Work with state-of-the-art technology.

Any questions to the position, please contact Group Logistics Manager Allan Ernstrøm on +45 2179 1399.

Send your application & CV, marked "Project manager Supply Chain" no later than 15/10 2021 to [job@avk.dk](mailto:job@avk.dk).

#### About AVK

We develop, produce and deliver products for primarily water supply, wastewater handling, gas supply and fire protection.

Our focus is on tailoring and creating efficient, green solutions that can contribute to our common UN goals towards ensuring sustainable development worldwide.

The AVK Group covers 100+ production and sales companies in more than 80 countries, and counts 4,400+ dedicated employees. Our AVK headquarters lie in Galten/Skovby, including Business Development alongside other departments delivering global support to our many subsidiaries.

The Group is in continuous growth, and the recent years have welcomed many development projects all over the world.
